Office of the City Manager  
City of Greensboro  

September 9, 2011  

TO: Mayor and Members of Council  
FROM: Rashad M. Young, City Manager  
SUBJECT: Items for Your Information

Contact Center Feedback  
Attached is the weekly report generated by our Contact Center for the week of August 29, 2011 – September 4, 2011.

September 13, 2011, City Council Meeting  
Agenda Item #7: National Public Relations Initiative: Attached is background information related to the National Public Relations Initiative, which is on the agenda for the September 13, 2011, Council Meeting, at the request of Councilmember Matheny.

September 20, 2011, City Council Meeting  
Extension of Agreement with Republic Services of NC, LLC: Attached is a memorandum from Field Operations Director Dale Wyrick, dated September 7, 2011, regarding the extension of the current disposal agreement with Republic Services of NC, LLC, through December 31, 2011. This item will be on the September 20, 2011, Council agenda for consideration.

Parks and Recreation FY 2010-2011 Annual Report  
Attached is the City of Greensboro Parks and Recreation Annual Report for fiscal year 2010 – 2011. This report highlights the major accomplishments over the last year for the department.

Statewide Diversity Reception  
The Human Relations Commission (HRC), in partnership with the Diversity Leadership Conference, is hosting a special reception in recognition of September as Statewide Diversity Month. The reception will be held on Thursday, September 15, 2011, from 5:30 pm - 7:00 pm at the International Civil Rights Center and Museum. The Governor's Diversity Month Proclamation will be read by HRC Chair Nancy Hoffmann, followed by a tour of the museum. The event will be free of charge for attendees.

The Diversity Leadership Conference on September 16, 2011, is presented by the Committee for Persons with Disabilities, The HR Group, Vocational Rehabilitation of NC, and the News and Record.

Community Oriented Policing Services (COPS) Grant  
Attached is a memorandum from Police Chief Kenneth Miller, dated September 9, 2011, regarding the results of a site visit on August 25, 2011, by Grant Monitoring Specialist Alex Edwards, with the US Department of Justice, related to the COPS grant the City received.

Grants  
Attached is an updated list of grants for which the City intends to apply that do not require a match. Under the policy adopted by City Council, grants that do not require a match are not required to receive formal Council action.

Comments

We received a total of 4 comments this week:

Field Operations -- 2 comments:

- Customer wants to suggest that the city place a site at the Fire Stations around the city to dispose of batteries (household batteries only). Most people will not go to Patterson to dispose of batteries. It will help keep the batteries out of the Landfill. Or have another way. The recycle truck can pick them up.

- Recycle every other week just does not make sense. You need to pickup bags of recycling. This is just crazy.

Transportation -- 1 comment:

- To whom it may concern: I have noted that the bike lanes, specifically on Spring Garden St., have been used wrongly as a passing lane by vehicles and I would like to express my concern for the cyclists using these lanes. Today I was passed twice in my car after stopping for turning traffic as vehicles entered the bike lanes. Last Thursday, I saw a tractor driving in the bike lanes from Merritt Dr. on Spring Garden to Aycock St. Not only does this endanger cyclists, it is illegal and dangerous to other vehicles that stop for turning traffic on Spring Garden. It is my fear as a student, cyclist, and friend of many cyclists, that if this practice of using the bike lane for cars and large farm and construction equipment continues, that someone will be seriously injured or worse, killed.

Water Resources -- 1 comment:

- Customer wanted to suggest that Water Resources could save a lot of effort and money if they were to make attempts to call the customers that are scheduled for disconnection due to non-pay. He says that if he had gotten a call, even an automated one, he would have taken notice and immediately paid the bill, thus saving us two trips to his house.

Overall

Calls about the reversal of the Millstream annexation increased last week as customers had questions about reimbursement of legal fees, property, and vehicle taxes. Calls about privilege licenses and overgrown lots remained steady. Call volume continued to be busy through the end of the week.
Memorandum

To: Members of Greensboro City Council
From: Jason Cannon, Vice-President of Governmental Affairs, The Greensboro Partnership
Date: September 7, 2011
Re: Earned Media/National Public Relations Initiative

In September 2009, the Greensboro Partnership began working with RLF Communications, with start-up funding provided by the Cemala Foundation and the Partnership itself, to proactively spread the word about Greensboro through national media outlets.

The objective of RLF Communications' work with the Partnership is to encourage economic development by raising the city's overall national profile in the media. When companies and individuals are considering locations for business expansions or relocations, major events, and conventions, the goal is to ensure that Greensboro is in the "considered set" of southeastern competitor cities, including Chattanooga, Louisville, Greenville, Richmond and Raleigh/Durham.

Since engagement by the Greensboro Partnership, RLF has created and executed a national media relations campaign to better tell the Greensboro story, focusing on four broad themes: Education, Sports/Tournament Town, Business/Entrepreneurship and Quality of Life.

This use of national media relations as an element of ongoing marketing and promotional efforts is not unusual, and many other cities across the country employ public relations firms to generate media coverage and raise awareness of their communities.

Thanks to support from local organizations and Greensboro Partnership stakeholders, RLF has secured 34 national media stories and 9,947,815 national readership impressions, worth a total of $2,203,000 in media value, in the past 21 months. This includes coverage in high-profile outlets such as the Associated Press, The Wall Street Journal, The Los Angeles Times, MSN Money, and USA Today.

Given the success of the media relations campaign and the benefits brought to Greensboro as a result, the Greensboro Partnership respectfully requests City Council's approval of a $20,000 investment to assist in the continuance of this initiative.

Enclosed you will find a more detailed overview of the Greensboro Partnership's National Public Relations Initiative, including challenges, objectives, strategies, tactics and results. Also attached is a second-quarter report detailing RLF's efforts on the initiative from April 1 – June 30, 2011, as well as a selection of articles born from RLF's efforts.

As always, thank you for your time and consideration. Please do not hesitate to contact me at 336-387-8330 or jcannon@greensboro.org should you have any questions.
Greensboro Partnership’s National Public Relations Initiative Overview

Background
RLF began work with the Greensboro Partnership in September 2009, with funding provided by the Partnership itself and the Cemala Foundation. RLF was engaged to provide proactive national media relations to aid the Greensboro Partnership in its mission of creating, expanding and attracting business while advancing the quality of life for all.

Challenge
With a resurgence of its core downtown district, diverse neighborhoods, an enviable higher education system, and an outstanding base of companies across a wide range of industries, Greensboro is a community where the best and brightest companies and individuals from around the country should desire to work, live, play and visit.

The challenge was that this story was not adequately being told. Although a number of different groups within the Greensboro community were communicating the city’s benefits and successes (City Council, economic development, convention and visitor’s bureau and individual entities such as the Coliseum, museums and universities), there was no over-arching effort to more effectively tell the Greensboro story, particularly on a national level.

Objective
The objective of RLF’s work for the Partnership was (and continues to be) encouraging economic development by raising the city’s overall national profile in the media. When companies and individuals are considering locations for business expansions, business relocations, major events and conventions, and the like, the goal is to ensure that Greensboro is in the “consideration set” along with Charlotte, Raleigh, Durham and other southeastern competitor cities. Since engaged by the Greensboro Partnership, RLF has created and executed a focused national media relations campaign to better tell the Greensboro story, raise the city’s profile and reach audiences that matter to the future of our community.

Strategy
To develop an effective media relations strategy, RLF and the Greensboro Partnership held a series of preliminary input sessions with organizations and individuals, including members of the City’s communications staff, whose stories would help promote Greensboro to external audiences.

As a result of these input sessions, which were enhanced by insightful feedback from City staff, an initial strategy was developed to secure media coverage by focusing on four broad themes to raise Greensboro’s national profile:
1. Education
2. Sports/Tournament Town
3. Business/Entrepreneurship
4. Quality of Life

As part of the campaign strategy, RLF and the Greensboro Partnership also established benchmarks for success by measuring Greensboro’s share of media coverage relative to competitor cities, as determined by the Partnership with input from City communications staff: Chattanooga, Louisville, Greenville, Richmond, and Raleigh/Durham.

The Partnership’s use of national media relations as an element in its ongoing marketing and promotional efforts is not unusual. Many other cities around the country employ public relations firms to generate media coverage and raise awareness of their communities.

Tactics
To achieve the set objective of encouraging economic development by raising the city’s national profile in the media, RLF pursued the following tactics:
- Establish informational interview meetings with organizations and individuals - including entrepreneurs and professionals in key industry clusters, local colleges and universities, museums and other cultural attractions, and major sport organizations and facilities - whose stories would help promote Greensboro to external audiences.
- An active participant in these informational interview meetings, the City assisted efforts to promote Greensboro in a positive light by providing input on initiatives and programs like the Greensboro Development Services Center and the Volunteer Center 9/11 Commemorative. In addition, members of the City’s communications staff attend quarterly stakeholder meetings, from which the Partnership and RLF draw the bulk of story leads.
- Build, maintain and update a broad media database of reporters who should have Greensboro on their radar screen. This database encompasses print (newspaper, magazines), broadcast (TV, radio) and online. The database includes media who cover the four themes (Education, Sports/Tournament Town, Business/Entrepreneurship and Quality of Life) identified as key areas of focus.
- Research, develop and proactively pitch media on Greensboro-related stories on an ongoing basis. Develop themes and specific ideas that resonate with media and generate positive media coverage. Monitor relevant media outlets for industry trends and story ideas.
- Coordinate, prepare and facilitate interviews between media and key Greensboro organization leaders, including employees of the City.

Results
By the Numbers
Since the fourth quarter of 2009, RLF has secured the following on the Partnership’s behalf:
- 9,947,815 national readership impressions
- 34 stories
- $2,203,000 total media value

Story Breakdown
Since the Greensboro Partnership started work with RLF Communications, Greensboro has won increased national media coverage in the four areas designated as key for economic development.

- Business/Entrepreneurship
  Articles about the Greensboro Development Services Center (story lead courtesy of the City Council), America’s Best Manufacturing Locations (Greensboro included) and a profile on Greensboro-based RF Micro Device as “Building an Innovation Culture” have been included in IndustryWeek, the premiere trade publication for the manufacturing industry. In addition, stories on the Commercialization of Micro-Nano Systems (COMS) have appeared in a variety of national electronic manufacturing industry websites.

- Quality of Life
  Articles about The Volunteer Center 9/11 Commemorative, the Greensboro Children’s Museum’s Edible Schoolyard and the International Civil Rights Center & Museum have appeared in major national media outlets, including the Associated Press, AOL.com, CNN iReport blog and The Washington Post.

- Education
  Articles about the Joint School of Nanoscience and Nanoengineering (JSNN)’s emerging concussin detection technology, as well as the University of North Carolina at Greensboro’s “UNC-G in Three” initiative have appeared in major national media outlets, including The Wall Street Journal, Los Angeles Times online, MSN Money and ESPN.com.

- Sports
  Articles about the Wyndham golf championship’s ground breaking use of social media, the ACC Hall of Champions opening, John Isner’s record-breaking tennis match, and the general appeal of the city as a “tournament town” have appeared in major national media outlets, including CBSSports.com, Sports Business Daily, Yahoo! Sports, NBCSports.com and AOL.com.
Greensboro Partnership
National Media Relations Effort
April 1 – June 30, 2011
Overview

When RLF began work with the Greensboro Partnership in September 2009, we developed an initial strategy to secure media coverage by focusing on four broad themes to raise Greensboro's national profile:

1. Education
2. Sports/Tournament Town
3. Business/Entrepreneurship
4. Quality of Life
Media Measurement and Analysis

- Using the article’s length, we calculate the advertising equivalency for every article using a formula developed specifically for the public relations industry. We use specialized services, such as Factiva and PR Trak, to determine these values.

- RLF Communications conducts ongoing monitoring of Greensboro’s national media coverage, as well as competitor cities: Chattanooga, Louisville, Greenville, Richmond, and Raleigh/Durham.
In total, from April 1 – June 30, 2011, national media coverage of Greensboro reached approximately 8,560,966 readers, worth a total of $1,060,854.65 in media value. See below for a breakdown of this total by subject matter.

Greensboro Readership by Subject: April - June, 2011
From April 1 – June 30, 2011, Greensboro secured approximately 6,041,988 positive readership impressions, 255,178 neutral impressions, and 792,891 negative impressions. This is the first quarter we have reported a negative story for Greensboro. It resulted from CNN’s “Defining America” profile on the city.

Greensboro Readership by Tone: April - June 2011

- Positive: 255,178 ($112 K)
- Neutral: 0
- Negative: 792,891 (-$1.9 M)
Through ongoing media relations work with the Partnership, RLF continues to obtain national media coverage. In the second quarter of 2011, RLF secured 289,189 in readership with a total media value of $7,740.26. While readership was high, these were trade publications which do not carry high media values. The red represents coverage obtained by RLF on behalf of the Partnership, while the blue indicates organic coverage for the city overall.
RLF provides national media coverage for Greensboro each quarter. In the second quarter of 2011, RLF obtained a total of four stories.
Education
RLF obtained coverage for the University of North Carolina at Greensboro in an article featured on SayCampusLife.com. This article highlighted UNCG as one of the five colleges to make the nationally based Education Trust's affordability grade in 2011. UNCG was chosen based upon its net annual cost, graduation rate and low-income student enrollments. UNCG Chancellor, Linda P. Brady, was quoted about the university's dedication to providing a college education to deserving students regardless of their financial situation.

Quality of Life
RLF outreach helped highlight Greensboro's Proximity Hotel becoming LEED Platinum Certified. As the first hotel to receive the US Green Building Council's highest award, the Proximity has earned the title of greenest hotel in the country. The hotel received coverage in Energy Digital as well as Property Magazine.

CNN brought quality of life coverage in Greensboro as part of its "Defining America" summer series across the nation. RLF helped provide CNN with content for their cultural census of the city, which resulted in a CNN iReport story about a downtown Greensboro First Friday event.

CNN later reported a negative story on the ongoing racial tensions in Greensboro. The highlight of the story was the positive mention of the International Civil Rights Center & Museum, which RLF helped coordinate. Outside of RLF’s outreach, CNN’s Eatocracy released two features celebrating Greensboro cuisine, new and old. The first highlighted Donut World, a new addition to Greensboro that has local donut lovers converting from the North Carolina standard, Krispy Kreme. The second focused on the history and cultural significance of liver mush, a classic North Carolina treat that has withstood the test of time.
Sports
CBS Sports, ESPN, and MLB.com all mentioned the Greensboro Grasshoppers when they played the Hagerstown Suns. Bryce Harper, the No. 1 overall pick, who will play for the Washington Nationals, blew a kiss on his way to home plate during the game.

The National College Athletic Association (NCAA) also reported how Greensboro's Grandover Resort was selected to be the site of the 2011 NCAA Division III Men's Golf Championship. Guilford College and the Greensboro Sports Commission hosted the 37-team event. Not only was Greensboro home to this year's championship, but home to this year's championship winner as well. In a six-shot win, Greensboro College captured their first championship title since 2000.

Business
U.S. Agriculture Secretary Tom Vilsack chose the Gilbarco Veeder-Root plant in Greensboro as the location for his formal announcement of the federal government's initiative to increase the production and use of renewable biofuels by providing financial assistance to gas stations and biorefineries. The Veeder-Root plant produces flexfuel-friendly E-85 pumps. This story received coverage from numerous outlets including Forbes, MSN Money, ABC News, CBS News, The Boston Globe, and Bloomberg.com.

The Financial and Automobile Magazine provided coverage of Greensboro's Honda Aircraft Company. HondaJet successfully reached a maximum operating altitude of 43,000 ft. during flight testing at the company's headquarters in Greensboro. Bloomberg BusinessWeek also did a profile on the founders of Market America, which is based in Greensboro. And Forbes ranked Greensboro as the fourth least expensive place for doing business in America.

The Education Trust

There are a handful of colleges making the affordability grade with the Education Trust. Identifying the ideal path must be part of this process. Keep an eye on financial aid policies to best fit your income.
QUALITY OF LIFE COVERAGE
COMPETITOR CITIES COVERAGE OVERVIEW

RLF monitors national media coverage for six cities identified as "competitors" by the Greensboro Partnership. What follows is an overview of coverage we've seen from these cities over the past three months. The red notes the RLF coverage for Greensboro.

Second Quarter 2011: Readership vs. Competitor Cities

GSO Partnership readership
Sports
*USA Today* provided coverage of the 2011 Senior PGA Championship, held at Louisville’s Valhalla Golf Club. While the rainy weather made for less than ideal conditions on the course, the event was a success in bringing an estimated $25 million to the Louisville economy.

The annual Kentucky Derby race received significant coverage in *Yahoo! Sports*, *The New York Times* and *ESPN*. Churchill Downs was also became the victim of turbulent weather in June when a tornado touched down at the Louisville track. Fortunately, the home of the Kentucky Derby sustained minimal damage and was able to continue its nightly races as scheduled. *CNN*, *Reuters*, and *TIME* are a few of the outlets to cover this story.

Business
The Louisville Zoo gained national attention when it successfully completed “Operation Snowflake,” the adoption of an orphaned polar bear cub from Alaska. *Fox News*, *MSNBC*, and *The Huffington Post* were among many media outlets that featured this heartwarming story.

*Bloomberg BusinessWeek* continued their coverage of YUM! Brands Inc. and their latest success in China. The article focused on the Louisville-based company’s $862M buyout of Little Sheep Group Ltd., operator of a Chinese chain of hot pot restaurants.
RALEIGH, N.C.

Education
Forbes and Bloomberg BusinessWeek both featured an article on the North Carolina Schools Coalition’s fight to keep an additional cent on the state sales tax. The expiration of that extra penny would mean a loss of $1.1 billion generated for public schools. If the House includes this much needed funding in their budget cuts as expected, it could seriously damage the state’s public school system and cause thousands to lose their jobs.

Business
Raleigh earned the number one spot on Forbes’s annual list of the “Best Places for Business.” Raleigh was chosen for having a strong educational presence with University of North Carolina, Duke University, and North Carolina State all close by. Employers are attracted to Raleigh for its low costs of doing business and educated labor force. With the second highest net migration rate in the country over the past five years, Raleigh is seen as “a hot hub” for business.
RICHMOND, Va.

Quality of Life
Richmond was featured in an Associated Press article about the Civil War's 150th anniversary on April 12. This date not only marked the beginning of the Civil War, but the beginning of the end for the Confederacy, an institution that is still very much a part of Southern Culture today. The Museum of the Confederacy in Richmond commemorated the date with a series of events. The story was also featured by NPR and MSNBC.

Sports
Bloomberg, The Washington Post, and Yahoo! Sports were among the outlets to report VCU's "fairy tale" journey to the Final Four. The Rams made headlines throughout the season, with an uncharacteristic number of upsets against teams that have historically been basketball powerhouses. VCU's record season came to an end with a loss to Butler, landing them fourth place in the tournament.
Brain injury detection on the hill?

By Cameron Walker
ESPN Action Sports

A handheld tool being developed to catch head injuries in the field could be a boon for skiers and snowboarders. Researchers from a range of disciplines working together at the Greensboro Joint School of Nanoscience and Nanoengineering in North Carolina are designing a portable device that can test for mild traumatic brain injury -- which can include a concussion -- on the spot, anywhere from a ski slope to the scene of a car accident.

Mild brain injuries may sound, well, mild -- but they're among the hardest things for doctors to diagnose, says Marinella Sandros, the researcher leading the project. And they can be trouble. If you shake off a good bell-ringing and keep skiing, you're more likely to fall again and re-injure yourself.

Repeated concussions have been linked to loss of memory and other brain functions, and years of hard hits can cause problems from dementia to depression to Parkinson's disease.

Sandros and her team are developing a device that would use a blood, saliva, or urine sample from a person with a suspected head injury. A chip will sense the presence of compounds in the body that the brain releases when it's injured -- a test that could be done quickly on the scene of an accident, whether on the hill or on the football field, and by anyone from military medics to first responders at an accident.

Catching concussions and other brain injuries right after they happen could prevent the risk of further injury. If head injuries can be looked at within the first few hours, treatment is much more effective.

It may be several seasons before skiers might see patrol wielding one of these, but researchers anticipate having a prototype by the end of 2011. A device may be widely available, following testing and clinical trials, within five years.

These days, people must often rely on subjective methods -- like whether a person is acting dazed or confused, or has balance problems--to spot mild brain injuries, says the University of North Carolina at Greensboro's Kristine Lundgren, who is working on the project. Hospitals rely on methods like MRIs and CAT scans, which look at physical changes in the brain -- changes that often don't show up with a mild brain injury.

Tests looking at brain injuries from a molecular point of view require specialized equipment and training, and are primarily done in research labs. "What we're really looking to do is take out all of those complexities and package this in a way that's going to be much more usable on the spot," says Vince Henrich, the director of the Center for Biotechnology and Health Research at UNCG and a microbiologist on the project.

The researchers hope their device might be as widely available as automated external defibrillators (AEDs),
which were once found only in hospitals but now have a place in many ski patrollers' first aid kids.
SLAM ONLINE » ACC Hall of Champions Debuts

ACC Hall of Champions Debuts

The Atlantic Coast Conference (ACC) Hall of Champions debuted at the Greensboro Coliseum Complex in Greensboro, N.C. today. Below you’ll see comments from ACC Commissioner John Swofford and local representatives, along with a list of features that will be included in the hall.

"The opening of the ACC Hall of Champions is an exciting momentum for the Atlantic Coast Conference," said Swofford. "It's extremely fitting that this tribute to our league is not only in Greensboro, where our conference was founded, but also a part of the Coliseum Complex where so much of our basketball history and tradition has taken place."

The $2.3 million Hall of Champions measures 8,100-square-foot, with additional phases set to open in the future. The Hall of Champions will feature many exciting exhibits highlighting the history of the Atlantic Coast Conference, including:

-Interactive Broadcast Exhibit that allows patrons to call the sports shots. Visitors can review classic plays from the ACC's 56-year sports history, receive pre-recorded commentary tips from broadcast icons like Jay Bilas, and have an opportunity to commentate plays themselves from behind a replicated professional sports broadcasting desk.

-Interactive Trivia Exhibit challenges visitors to go head-to-head to prove their ACC sports trivia knowledge. Questions cover all twelve colleges in the ACC and results are announced on a state-of-the-art scoreboard.

-World of the ACC Multi-Media Exhibit located in the Hall's main entrance and features a four-foot, 360-degree, state-of-the-art video globe that will amaze and delight guests with a unique, multi-media display of conference highlights. The globe is inset into a collegiate rotunda constructed of ACC school-themed columns, one column for each of the 12 schools in the conference, and framed by exhibits dedicated to men's and women's basketball, football and current national championship teams.

-Life-sized Mascots from each of the 12 ACC schools are stationed throughout the Hall, where visitors can pose and be photographed with them.

-Independent Kiosks for each of the 12 ACC schools showcases content and memorabilia provided directly from each school.

-Visual Timeline of the 58-year history of the ACC, including athletic highlights, as well as social achievements such as integration and the introduction of women's sports.

-Overhead Banners highlighting national championship in all 25 ACC sports.

Greensboro selected to host global nanotechnology conference

(Nanowerk News) Organizers of a prestigious international nanotechnology commercialization conference coming to Greensboro, N.C. anticipate record attendance at the annual event scheduled for August 28 – 31. The Commercialization of Micro-Nano Systems (COMS) conference is presented by the Micro and Nanotechnology Commercialization Education Foundation (MANCEF). It brings together leaders from around the globe, across many industry sectors, to focus not just on science and technology – but on solutions in Small Tech commercialization.

Greensboro is home to The Joint School of Nanoscience and Nanotechnology (JSNN), the host of this year's event. JSNN, together with Gateway University Research Park, is one of the top economic development initiatives in the region. The conference is expected to draw not only scientists and researchers, but also private companies eager to generate new business. Greensboro has emerged in recent years as a leader in the innovative nanotechnology industry, with the JSNN offering skilled faculty and state-of-the-art equipment, like the Carl Zeiss Helium ion microscope.

"We are excited to show the world what we are accomplishing here in Greensboro," said Andrew Wooten, Director of Outreach and Commercialization at JSNN and Gateway University Research Park. "Our community has provided incredible support. Now our major focus is to establish additional partnerships with industry leaders and bring desirable knowledge/economy jobs to our region."

The COMS2011 conference will take place at the Grandover Resort and Country Club in Greensboro.

NOT EVERYONE WAS EVIL ON 9-11-01

Emergency responders share stories of survival, heroism

Associated Press

NEW YORK CITY — it was a beautiful, sunny, 70-degree morning with clear blue skies. Police Capt. Terry Revelle (Ret.) of the New York State Department of Environmental Conservation was on his way to work at his NYC headquarters when a dispatcher radioed him and said, "Captain, you need to get to the World Trade Center ASAP. A plane just crashed into it."

On the other end of the country on that same September morning 10 years ago, Debra Tosch was attending a canine search specialist class in Washington state when she heard of the attack. In North Carolina, Greensboro Fire Department Assistant Chief Alon "Skip" Nix was serving as the safety/special operations officer. In the hours and days following the most devastating attack on American soil in modern history, Revelle, Tosch and Nix would aid their fellow Americans in their own ways. Their stories and how they are working to remember 9/11 today are below.

The Haunting at Ground Zero

Revelle pulled up next to the north tower of the WTC and could see the gaping hole that plane put into its side. The exact outline of the wings and fuselage was visible.

"I met up with one of my officers, Jeff Cox, and we had just started to run up to the north tower when Jeff said, 'Captain, what are those black dots around the outside of the tower?'" Revelle recalls. "I said, 'They're people. Jeff.' He said, 'No. That can't be.'"

As people started to jump, one by one, two by two, Revelle and Cox could see they were, in fact, hundreds of desperate souls deciding their own fate.

"This moment has remained the most difficult and haunting to me to this day," Revelle says.

Moments later, Revalle and Cox were briefly trapped when the south tower collapsed. They were found by a firefight
work.

"We immediately started to set up an Incident Command Post at Public School 89, which is about ten blocks from th
Revalle. He did not return home for 17 days. "I served as the on-scene coordinator for the governor, to the city. While
assistance and instruction in getting backhoe, bulldozers ... anything else that was needed to remove debris in hop
survivors."

Now living in Las Vegas, Revelle is coordinating one of the largest 9/11 remembrance events in the West: 9/11 Remembrance Las
Vegas, to be held Sept. 9 through 11, will include a heroes parade and race/walk, among other events. "Our event is going to show
that unity and spirit of America we had on 9/11," Revelle says.

A National Effort

Debra Tosch and her canine partner, a black Labrador named Abby, were part of the second group of search-dog teams, arriving at
ground zero about 11 days after the attacks.

"We would search when requested, and when not searching with Abby I would work with another handler and use one of the search
cameras," Tosch recalls. "We did not find anyone, but I feel confident that we did our job of making sure no one was left behind."

Tosch went on to become executive director of the National Disaster Search Dog Foundation in Ojai, Calif. The experience of 9/11
helped her realize the importance of training.

"It has motivated me to have the Search Dog Foundation build a National Training Center ... handlers from all across the country can
come train on deployment scenario props that are designed to prepare them for the most difficult deployments they may face," Tosch
says.

A 9/11 anniversary event is planned to bring handlers and supporters of the Search Dog Foundation to the site of the National Training
Center and unveil the beginning of the construction. Handlers perform a demonstration and a Canine Memorial Wall will be unveiled.
Tosch is hoping to open the training center Sept. 11, 2012.

A Friend In Need

Being in North Carolina, Nix was not geographically close to any of the events on 9/11. But when the terrorist attack occurred, he
received a call from the wife of one of the firefighters in New York who was dispatched to the twin towers. She lived in Greensboro,
and two of her daughters were attending college in Charlotte, about an hour and a half away.

"We sent two firefighters to the school and brought her kids back to Greensboro to be with their mother," Nix recalls. "That afternoon
we took food to the home, spent time with the family and prayed with them before we left. We checked on them daily when, four days
t later, she was informed that [her husband] had been killed in the collapse."

The comfort and compassion Nix and his colleagues showed a fellow firefighter's family reflects the spirit of the community. The
Volunteer Center of Greensboro, N.C., has been chosen to lead in the 10th Anniversary 9/11 Day of Remembrance Observance along
with New York City and others. The event will take place from Sept. 9 through 11.

"Not only will we honor those who gave their life that day but also the men and women of the United States military who have given
their lives since 9/11," Nix says. "America will always be great as long as we have men and women who are willing to choose others
over themselves."

Greensboro Strives to Put the Service in Development Services

City aims to speed development approvals by having all planning services under one roof.

Monday, March 07, 2011
By Josh Cable When it comes to industrial expansion or relocation projects, Greensboro, N.C., Assistant City Manager of Economic Development Andy Scott has learned that time is of the essence.

"If we can do anything on our end to reduce the amount of time and the trouble and expense of the review process, it's something to our benefit, because that makes us more competitive with other locations," Scott says.

The city had that objective in mind when it established the Greensboro Development Services Center earlier this year. The center consolidates the city's key technical-review, permitting and building-inspections staff members from three separate buildings into one.

Staff members from every department needed to approve a development plan are available Monday through Friday mornings to review sketch plans and hold technical-review committee meetings.
"Any day that you have an issue, between 8 in the morning and noon, you can go to development services and all of the relevant departments are represented and you can be heard," Scott explains. "So instead of just having once-a-week [plan] submission, we have a rolling submission."

Thanks to the one-stop approval structure, a review process that previously might have taken a month or more can be completed in a matter of days, according to the city.

"What we were looking for was, "How do we take some of the pain and uncertainty out of the review process for the builder, the developer or the property owner?"" Scott explains. "How do we make it more efficient, how do we have fewer people touch the plan, and how do we get better decisions faster?"

The upgrades to the development-approval process go beyond the fact that previously siloed city staff members now are under one roof.

Coinciding with the new centralized facility, the city now offers:

- Pre-development meetings that allow any interested party to obtain zoning information on how a piece of property can be developed for commercial or residential construction.
- Electronic plan submission and review. Thanks to an interactive whiteboard with touch-screen technology, city staff members can project, review and edit a developer's plan on-screen, so a developer can leave the meeting with a revised plan in hand.

The electronic process also means developers no longer have to submit 14 copies of multiple pages, which was the average number for development plans, Scott adds.

"Developers and engineers pretty much agree that it cost about $700 in reproduction costs to do that," Scott explains. "By moving to electronic-plans transfer, we save a lot of time and a lot of energy and lot of trees."

Cross-training to Boost Efficiency

Scott points out that the city already had "very aggressive" customer service goals in place for its technical-review committee and building-plan review process "but chose not to change those in the first year [of the new center] because we didn't want people to feel pressured."

"We wanted them to learn the system," Scott says.

Long-term, though, the city aims "to get even more aggressive with our turnaround times, because ultimately the test of this is more efficiency on our end and better turnaround times on the customer's end," he says.

One way that the city will try to boost efficiency is by cross-training employees.

"One of the other issues that we had when we were more siloed, and I'll use planning as an example because I know more about that than some of the others, was we had individual silos within the silo," says Scott, who served as the city's director of Housing and Community Development (now the Department of Planning and Community Development) from 1993 to early 2009. "So if your job to
review plans was landscaping. And then for zoning, you passed it onto somebody else, and for setbacks you passed it on to yet another person. So in planning you might have three or four different people look at the same plan.

"Our goal is to do enough cross-training that 75% of the time one person from planning, one person from transportation, one or two at most from water resources, would look at the plan."

The city also hopes that the centralized work environment will promote collaboration among those involved in the development-approval process.

"Having all these folks working together on a daily basis and getting to know each other and each other's issues instead of being in separate offices spread across the city, that's making better problem-solvers of them," Scott says.

Reputation Matters

With the new Development Services Center, city officials hope to make it easier for contractors and residents to do business with the city. And that, hopefully, will make a positive impact on Greensboro's economic development efforts.

"There's a small stable of economic development consultants who control the majority of industrial relocation, and you generally pick up a reputation for being a good place to work with or not," Scott says. "And anything we can do to enhance that is just that much more helpful."

Scenic Routes Road-Tested by the Pros

Auto Makers Scout Winding Byways, Sights That Make Driving Trips Fun

By Joseph B. Wells

Driving is too often a chore undertaken to get a new home to work on all-too-familiar center line where to go when you want to take in some scenery, play hooky, or do something more ambitious with your driving machine than push the speed limit in the I-5 Pass toll lane? The sites of the Sunday drive may sound quaint for people who have no choice but to hurry from Point A to Point B all week, but it's great when you have a little time and an itch to explore...
WORK & FAMILY

Speeding College to Save $10,000

By Susanne Miller

When Samantha Chapman chose to go to Manchester College last year, it was one big deciding factor: The Indiana school had a new program that would let her speed to a bachelor's degree in just three years, saving her family about $10,000.

For years, the amount of time it takes to earn a bachelor's degree has been going up, thanks to one-third of students at four-year colleges who will not graduate within four years. Education Department data show that, on average, students now take more than five years to graduate.

The programs are a win-win for the driven, high-achieving students who are willing to accept financial risk. Some students and parents opt for a two-year college degree program to save money and avoid the high tuition costs of four-year institutions.

Eric: Hear about Pete's mom?

John: She wanted to take care of him after she went.

Eric: Nobody counted on the bills.

John: God bless the man.

Eric: ??!

Samantha Chapman chose Manchester College, in part, for its three-year degree program. Total savings: about $10,000, but no summer off.

And many kids end up slowing down. At Florida State University, which launched a three-year program in 2000, about 40% of three-year students wind up taking four years. To add another major study abroad or take part in student government, says Linda Mullen, the program's director, it was decided they don't work as many hours.

While enrollments are small so far, the three-year program generated a lot of interest. Hartwick, which announced its program last year, expects to enroll twice as many freshmen as expected or about 20 to 250 in the coming class of 450 to 500, says Margaret Bragman, president. The University of North Carolina, Greensboro, which announced its program in February, has received 319 inquiries from entering freshmen thus far, says Steve Robinson, dean of undergraduate studies.

Enrollments in Florida State's program are 77% to 83 last fall from 78 in the past, the university says.
September 7, 2011

TO: Rashad M. Young, City Manager

FROM: Dale Wyrick, P.E., Director

SUBJECT: Amendment to Disposal Agreement with Republic Services of North Carolina, LLC

This purpose of this memo is to inform you that staff has received signed copies of a second amendment to the current disposal agreement with Republic Services of North Carolina, LLC. This amendment extends the existing agreement, which is scheduled to expire September 30, 2011, through December 31, 2011. At this time, no other extensions or amendments to the disposal agreement have been explored.

This disposal agreement with Republic Services has been in place since October 1, 2006. Currently, municipal solid waste (MSW) is taken to the City’s transfer station located at 6310 Burnt Poplar Road. Under separate agreement with Hilco Transport, that waste is transported to the Uwharrie Environmental Landfill, located in Mt. Gilead, North Carolina, where it is disposed. The current cost for hauling waste with Hilco is about $13.32 per ton, combined with a disposal rate of $24.34 per ton, for a total of $37.66 per ton hauling and disposal cost.

Funding for the disposal of municipal solid waste was budgeted in 551-6509-09.5429 for FY2011-12. No additional funds are required for this amendment. Under the terms of the disposal agreement, the City pays $24.34 for each ton of MSW delivered to Uwharrie Environmental Landfill. Assuming a 3-year average monthly tonnage collected by the City, the disposal costs to the City by this extension will be approximately $845,000.

Figured as shown below:

<table>
<thead>
<tr>
<th>3-year average City-collected tonnage</th>
<th>Tonnage</th>
</tr>
</thead>
<tbody>
<tr>
<td>for October</td>
<td>11,887 tons</td>
</tr>
<tr>
<td>for November</td>
<td>10,944 tons</td>
</tr>
<tr>
<td>for December</td>
<td>11,750 tons</td>
</tr>
</tbody>
</table>

3-month total tonnage: 34,581 tons

(34,581 tons)($24.34/ton) = $841,702, say $845,000.

Per your request, this amendment will be placed on the August 20, 2011 City Council meeting agenda for Council approval. If further is required, please advise.

Our Mission

"The Greensboro Parks & Recreation Department exists to provide professional and diverse leisure opportunities through inclusive programs, facilities, parks and open space, ensuring that Greensboro is a desirable place to work, live and play."

Message from Director Greg Jackson...

We are pleased to share this Fiscal Year 2010-2011 Annual Report, highlighting major accomplishments for the Greensboro Parks & Recreation Department. This year saw the release of bond dollars, which enable us to move forward with several significant projects, including the completion of Phase I of the Gateway Gardens and the beginning of construction at Keeley Park.

The department was reorganized to improve facility maintenance and expand programming opportunities for our residents. Our staff and management team remain dedicated to providing high quality customer service for the residents of Greensboro. We continue to build and strengthen community partnerships to ensure leisure recreation at its finest for people of all ages, abilities and from all walks of life.

Departmental Highlights

- **Keeley Park Phase I**: Construction began in July 2010
- **Gateway Gardens Phase I**: Grand opening was held on April 10, 2011
- **Village at Northside Park**: KaBOOM! playground and community garden build day was held on May 21, 2011
- **Hagan-Stone Park**: Park master plan was completed; construction began on the Bradley’s Fun For All Playground
- **Athletics**: Hosted the Metropolitan Junior Baseball League World Series in July 2010
- **Greensboro Sportsplex**: Olympic Gold Medalist Misty May-Treanor conducted volleyball clinics for over 200 participants in October 2010
- **City Arts**: Hosted “The Flag of Hope” in March 2011, featuring Latino artist Edwin Gill in a nationwide traveling “Hands-on Art for Social Change” project

Awards & Recognitions

- Greensboro named “2010 Playful City USA” by the KaBOOM! Corporation
- Greensboro named “Tree City USA” by the National Arbor Day Foundation

Grant Awards

- **The Hope Project**: $200,000 from the Joseph M. Bryan Foundation and the Weaver Foundation
- **City Arts Music Center**: $12,500 Cultural Partners Investment grant from the United Arts Council; and $6,700 grant from the Community Foundation of Greater Greensboro for Music for a Sunday Evening in the Park
- **Greensboro Seniors**: $5,443 grant and $3,500 Title III-D grant from the Piedmont Triad Council of Governments for health promotion
- **Athletics/Kernodle School**: $5,000 Special Events and Tourism Related Activities Committee (SETRAC) grant from Greensboro Area Convention and Visitor’s Bureau
- **Trails and Greenways**: $5,000 Adopt-a-Trail grant from the NC Department of the Environment and Natural Resources for boardwalk replacement on the Piedmont Trail
- **Caldwellheugh Multicultural Arts Center**: $2,350 grant from the United Arts Council to provide lighting and sound workshops for the We Are One program
- **Greensboro Youth Council**: $1,500 grant from the Community Foundation of Greater Greensboro for Camille’s Magic Closet project
Greensboro Parks & Recreation ended Fiscal Year 2010-2011 with revenue increases in areas such as concessions, contracted tennis fees, contracted parks and recreation programs, non-resident fees, group sales, and rentals. Bond project dollars were released for the completion of Phase I of the Gateway Gardens and Phase I construction at Keeley Park.

EXPENDITURES:
Total Personnel Services 8,694,682
Total Employee Benefits 3,477,207
Total Maintenance & Operations 6,259,167
TOTAL EXPENDITURES 18,431,056

REVENUE:
TOTAL REVENUE 4,137,725

NET COST OF OPERATIONS: 14,293,331

ATTENDANCE:
Participation 1,890,589
Visitation 5,410,668
TOTAL ATTENDANCE 7,301,257

NUMBER OF VOLUNTEERS: 9,032

HOURS OF VOLUNTEER SERVICE: 77,971

Partnerships: Maintaining strong community partnerships are an important part of the continued success of the Greensboro Parks & Recreation Department. Below are examples of community groups, organizations and local businesses that have supported our programs and facilities in Fiscal Year 2010-2011.

September 9, 2011

TO: Michael Speedling, Assistant City Manager

FROM: Chief Kenneth C. Miller

SUBJECT: COPS Site Visit Outcome

The Greensboro Police Department was awarded a 2010 Community Oriented Policing Services (COPS) Hiring Grant to pay for thirty additional officers (salary + benefits) to increase the active force and improve community policing efforts. A site visit was conducted by the COPS Office on August 25, 2011.

The COPS Office conducts grantee site visits to ensure compliance with grant terms and conditions. These visits also provide firsthand observation of the grantee’s community policing strategies. Promising practices identified during site visits are documented and may be shared with the law enforcement community. Technical assistance and follow-up are conducted to address potential and actual vulnerabilities. The purpose of site visits is therefore three-fold: review community policing activities, ensure grantee compliance, and provide service and technical assistance. This review is generally performed over a one or more day period and provides an opportunity for agency representatives to seek assistance on any grant implementation issues.

Attached you will find the official response from the COPS Office with regard to the outcome of the GPD’s site visit from Alex Edwards, Grant Monitoring Specialist.

Receiving COPS funding will allow for greater manpower for the Greensboro Police Department. The additional positions requested for the department will increase everyday presence in the community, in the designated response zones, and allow for faster response time. It will also accommodate more staff to participate in community meetings, SCORE and other activities of the nature, voluntary annexations and the ability of the department to address community concerns identified by the City Council.

Via Email and U.S. Mail
Ms. Courtney Hemphill
City of Greensboro Police Department
300 West Washington Street
Greensboro, NC 27401

Dear Ms. Hemphill,

Thank you for your cooperation during the site visit conducted on August 25, 2011. I would like to extend my sincere appreciation to you and the City of Greensboro Police Department team for the planning and preparation you did for the site visit. You did a superb job orchestrating the round of interviews, scheduling the tour, and arranging all the documents I requested. Your conscientiousness did not go unnoticed.

The U.S. Department of Justice, Office of Community Oriented Policing Services (COPS) is required by Federal regulations to monitor all programs, projects, and activities funded by us to ensure your department’s compliance with the terms and conditions for each COPS grant and to review your department’s community policing efforts.

The COPS grant reviewed during the site visit was the COPS Hiring Program grant #2010UIWX0018. Based on the information submitted during the site visit, I do not require any further information. I would, however, like to provide you with additional feedback in some other important areas.

Community Policing

Currently, your department is pursuing the community policing strategies as described in your grant applications. I wish you continued success in the implementation of your community policing efforts throughout the county.

Nonsubplanting Requirement

All COPS grantees are prohibited from supplanting throughout the grant period. COPS grant funds may only be used to pay for officers’ salaries as of the grant award date.
Based on my review of the documentation provided during the site visit, it has been determined that your department is in compliance with the non-supplanting requirement.

**Reporting**

Your department appears to be filing the programmatic and financial progress reports and other required documentation in a timely and accurate fashion.

**Retention**

As a reminder, all COPS Office hiring program grantees are required to retain the additional COPS-funded officer positions funded under the C1HP grant program with local funding at the conclusion of the grant. If circumstances arise which appear to prevent retention, your department should immediately notify your COPS grant program specialist.

You may contact your Grant Program Specialist, Priya Sarathy-Jones, Grants Administration Division, at (202) 353-9790, if you have any questions concerning your COPS grant or for further grant program information.

Once again, thank you and for the assistance provided to me during the grant monitoring site visit. The COPS Office is vested in facilitating your success with community policing implementation. Please direct any correspondence to me at Alex.edwards@usdoj.gov or your may call me at (202) 616-3557 for any questions concerning this letter.

Sincerely,

Alex Edwards  
Grant Monitoring Specialist
